

10 Top Tips for Exam Success in Science

Prior to the exam:

1. Start revising early & complete your daily Tassomai task.
2. Use the PLC's to prioritise your revision.
3. Learn all the calculation formula.
4. Compartmentalise your revision into short 30 minute chunks.
5. Practice past exam paper questions and learn from the mark schemes.
6. Get a parent/carer/friend to test you.

When answering exam questions:

7. Read the question carefully, making sure you read the whole question, underlining key words and figures.
8. Underline the command words so you know what you are being asked to do.
9. Check the number of marks that each question awards.
10. Use relevant key scientific terminology in your answer.
